SUBSCRIPTION NOTE

Agon Workman will repair your

- **Electric sockets, switches, fans & lighting fittings**
- **WCs, wash-hand basins, baths, showers & sinks**
- **Door locks, bolts, hinges & keys**
- **Refrigerators, deep freezers & air conditioners**

After assessing the faulty fittings and appliances, Agon Workman will provide you with a written Materials Requirement & Estimate (if required) ONLY. If the price is acceptable, the subscriber will make the funds available for replacing the faulty item(s) and we will carry out the repairs and replacement without delay.

For subscribers to our **Easy Home Package**, the service will be available from 8.00am to 5.00pm (Monday to Saturday).

Our **Business Class Package** subscribers will have access to our emergency hotline, replacement of items up to ₦1,000 and liaison with relevant public utility service providers like PHCN and FCT Water Board to resolve maintenance problems relating to provision of services and facilities.

Our rates are based on actual operating costs plus a reasonable profit margin and not just because we are offering a first-rate service. If you are subscribing due to a referral, chances are that pricing will most likely not be a factor in your decision to subscribe to our service. You expect quality work and you already know we will provide it.

Do our rates seem expensive? Maybe, maybe not. But consider this: we pay liability insurance, vehicle insurance, and we have an equipped truck stocked with a selection of common parts. We also have a collection of tools and equipment that give us the ability to complete your work faster, safer, and with higher quality than some of the “cheaper” workmen you will find out there.

Most workmen rarely have any type of liability insurance. Some move around with a few tools and some basic parts. While most of them mean well and many do a nice job, many homeowners, business owners and offices do not realize that these workmen can be a significant liability to them or their property. With no insurance, what happens if they damage your fittings and/or appliances? And usually, the lower the cost, the lower the skill level.

We can usually complete the job in less time because we stock a large selection of common parts and have the tools necessary to do the job right on the truck. We do not waste time looking for tools, running home for the “right tool” or having to go and buy a simple part.

So in the long run, better equipment, readily available parts, and less time spent on the job equals a lower cost and higher quality work for our clients.
